EXPERIENCE

August 2022 - September 2022
Internship
NCDC, Szczecin

Design and implementation of a web application that randomly selects and appropriately allocates parking spots for company employees.

Angular   TypeScript   RxJS   Tailwind CSS   Git   Jira   Figma   Java

PROJECTS

February 2024 - April 2024
eSale 🔗

E-commerce web application. Users are able to add sale offers with images. Offers can be browsed and filtered by choosing appropriate category. Product's page contains its details and the way to contact the seller. Products can be added to favorites list. User also has access to recently viewed offers.

Angular   TypeScript   RxJS   Tailwind CSS   Angular Material UI   Firebase

January 2024 - February 2024
Typing speed test

Web application designed to improve typing speed by practicing typing the alphabet in order. User can track elapsed time via available stopwatch or look over all-time average statistics.

React   TypeScript   Redux   Tailwind CSS

December 2023 - January 2024
Stay hydrated

Mobile application written in React Native. Users are able to track amount of water they consume throughout the day. All records are stored and available for users. Daily water intake can be set manually or calculated automatically based on given weight, height and age.

React Native   JavaScript   Redux   SQLite

October 2023 - December 2023
Task management application

Web application that provides task management system and some social media features. Users can create, track and filter their tasks, search for friends or add posts that will appear on friends' feed.

React   Redux   JavaScript   Tailwind CSS   Express.js
Mongoose   MongoDB
